EDUCATION

Eötvös Loránd University
Bachelor of Science in Computer Science

Budapest, Hungary
Sep 2025 – Jul 2028

PROJECTS

Calories Tracker | *Node.js, TypeScript, Express, Prisma, PostgreSQL, Docker* Jul 2026 - Present

- Designed a modular REST API in TypeScript and Express using layered architecture (controllers, services, repositories) with centralized error handling
- Designed relational database schemas and automated migrations with Prisma ORM and PostgreSQL to track user nutritional logs
- Containerized the service with multi-stage Docker builds to ensure reproducible local and production runtime environments
- Wrote unit and integration tests with Vitest and Supertest to validate request validation, auth middleware, and database operations
- Integrated a lightweight client with JWT session persistence via bcrypt-secured tokens and optimistic UI state updates

YouTube Clone | *Next.js, TypeScript, Firebase, Google Cloud Platform, FFmpeg, Docker* May 2026 – Aug 2026

- Developed a Next.js client handling Firebase authentication and direct file uploads via signed URLs to prevent server bottlenecks
- Architected an event-driven media processing pipeline: Cloud Storage file uploads trigger Pub/Sub messages consumed by Cloud Run worker instances
- Containerized an FFmpeg service on Google Cloud Run to process asynchronous video transcoding, thumbnail generation, and multi-resolution rendering
- Persisted processed metadata and video manifests in Firestore while streaming output assets directly through Google Cloud Storage

Study Tracker | *Node.js, TypeScript, Express, Mongoose (MongoDB Atlas)* Apr 2026 – May 2026

- Built a TypeScript REST API on Express implementing MongoDB aggregation pipelines for user study statistics and subject breakdown summaries
- Implemented strict Mongoose schema validation and indexing to optimize query performance across timed session histories
- Deployed and maintained the web service on Render backed by a production-tier MongoDB Atlas cluster

TECHNICAL SKILLS

Languages: Typescript, Javascript, Java, Python, SQL

Backend & Databases: Node.js, Express.js, PostgreSQL, MongoDB, Prisma ORM, Mongoose, Firebase

Cloud & DevOps: Docker, Google Cloud Platform (Cloud Run, Pub/Sub, Cloud Storage), Render, Git

Frontend: React, Next.js, HTML, CSS

Testing & Tools: Vitest, Supertest, VS Code

LANGUAGE

English (C1), Vietnamese (Native)
